Term 2 Senior Tech Club: Programming using Java Script

Dear Parents,

Term 2, 2022 Tech Club will have a primary focus on teaching 3-6 students basic Java Script programming. Through two different computer software platforms, Blockly Games and CS First, LPS students will be introduced and exposed to the fundamentals of computer programming.

Blockly Games is a series of educational games that teach programming in a fun and engaging manner. It is designed for students who are inexperienced with computer programming. The aim is for students to gain an understanding of conventional text-based computer languages by the end of the course.

CS First is another resource that will be used to teach LPS students about computer science. Through access to tools and resources students will be exposed to CS from a young age, igniting their passion and curiosity for future opportunities in the computer science arena.

This is an exciting opportunity for your child to learn new skills or further develop skills they already have in this domain.

Kind regards,

Mrs Justine Williams
Principal

Mrs Leonie Dufty
Teacher Librarian & ICT Coordinator
